

TECHNICAL DATA

FRUIT BOX			
DESCRIPTION	Specially designed boxes for the export of fruit and capable of adequately withstanding extensive logistic chains. They are manufactured in different formats, with pine plywood, complying with NIMF-15 certification and phytosanitary measures.		
CHARACTERISTICS	<p>Insigne Pine plywood boxes, made with dried and plywood sheets joined with a highly resistant, durable, and environmentally friendly ureic resin adhesive. They have solid corner posts, ventilated heads, slatted bottoms, bars, and rotary cut veneer flaps, stapled with galvanized wire.</p> <p>We have the technology to customize the boxes, as we can print the sides and sides.</p>		
USE	<p>They are used as containers for fresh fruit and in the transfer to long distance destinations because of their excellent plywood properties.</p> <p>Export of foodstuffs such as table grapes and asparagus, among other species.</p>		
MOISTURE	The moisture content of the boards is less than 7%.		
SIZE	According to customer requirements.		
	Standard dimensions.	Box 300mm x 400mm	
		Box 406mm x 508mm	
		Box 400mm x 500mm	
Case 400mm x 600mm			
COMPONENTS	2 Headers	A sanded plywood header printed with ISPM 15 certification, with a clean, knot-free face.	<p>1 White board Header 3,6mmx100mmx392mm</p> <p>2 Corner pieces 32mmx32mmx113mm</p> <p>1 Bar 3,6mmx28mmx392mm</p>

	2 Sides	Plywood slats with or without shiplap. Quality: clean side. with knots up to 4cm.	shiplap imp. HT 3,6mmx100mmx500mm
	1 Bottom	Perforated and shiplap plywood pannel format, or in plywood slats or rotary cut veneer peeling with foliated plywood bars. In its face allows for strong knots, cracks, and resins that do not affect strength.	4 Slats 2,4x85x500 3 rotary cut veneer bars 3,6x30x392
