

TECHNICAL DATA

WOOD SHAVING/CHIP	
DESCRIPTION	Shaving/Chips from manufacturing processes that guarantee their purity and moisture content.
CHARACTERISTICS	Natural material with an approximate density of 110kg/m ³ . Free of bark with a low percentage of around 3%.
USE	It can be used for the manufacture of pellets or briquettes, chipboard production, and also for agglomerate and biomass fuel.
MOISTURE	8% - 16% moisture content.
