

TECHNICAL DATA

TREATED POLES		
DESCRIPTION	The cylinder pole is obtained from the unwinding of the pine pieces that are used for the manufacture of plywood, which guarantees a uniform diameter.	
CHARACTERISTICS	Cylindrical pole of uniform diameter. Wood impregnated with Chromated Copper Arsenate / CCA but they are not certificated due to the low chemical assimilation	
USE	It is recommended for ornamental uses in gardening such as fences, stakes, or fruit vines. It is not recommended in definitive constructions since its origin does not allow to guarantee structural stability. Suitable for the construction of children's playgrounds.	
MOISTURE		
SIZE	Diameter	Length
	From 3" to 6"	1,1m to 2,6m
